ABOUT ME

Curiosity and critical thinking drive how I approach problems. I'm always asking questions and doing my best to understand how things work — whether it's an architecture or a security process. I'm especially interested in highly scalable solutions and how I can contribute push and enhance security. Communication is important, and I strive to create a warm working environment with open dialogue and a helping hand when needed. :) I'd be more than delighted to talk about singing techniques and financial literacy!

COMPETENCIES

Programming Languages	Python, Bash, Java, JavaScript, SQL, PL/SQL, Go, C#, C++, PHP, Rust, PowerQuery
Standards & Frameworks	CIS Benchmark, AWS Security Foundations, DORA Compliance, OWASP Top 10, ISO 27001
Technologies & Tools	Cloud, Kubernetes, Containerization, Configuration Management, Cloud Provisioning
Methodologies	DevSecOps, S-SDLC, Source Code Reviews, IaC, DAST, SAST, SCA, Scrum, Kanban

PROFESSIONAL EXPERIENCE

Present August 2024	Security Engineer Specialist Application Security - Euronext , Porto, Portugal (Remote) - Key member of the security team at the European Stock Exchange (Euronext), securing systems across Euronext and its group companies. - Defined and standardized the Secure Software Development Lifecycle (S-SDLC) as part of the convergence initiative to unify development processes. - Led security tool integration across diverse CI/CD stacks, delivering adoption and vulnerability KPIs to technical and executive stakeholders. - Guided developers and DevOps teams in adopting security best practices to strengthen the overall security posture, while advocating for a transition to a microservices-based architecture S-SDLC IaC AWS EKS Wiz AWS Security Foundations DORA Compliance Python Excel Power Bi
August 2024 February 2022	Security Engineer Infrastructure Security - Farfetch , Porto, Portugal (Remote) - Part of the infrastructure security team at Farfetch, the leading global marketplace for luxury fashion. - Ensured compliance by validating system configurations and deploying security tooling across all Farfetch's infrastructure. - Maintained and automated WAFs, network policies, and DMZ segmentation to secure critical assets and support service availability. - Built Kubernetes-native automations to improve visibility in the vulnerability management process and responsiveness using Helm Charts, ArgoCD, Docker Compose, and Makefiles. DevSecOps Azure AKS Stackrox Saltstack CIS Benchmark Bash Phishing
November 2021 July 2020	Security Engineer - VOID Software, S.A. , Leiria, Portugal (Remote) - At Void software house, I was responsible for maintaining and integrating into the CI/CD pipeline - Designed and implemented DAST to enable automated security scans during pipeline execution. - Evaluated and integrated multiple SAST tools (Wapiti, InsiderCLI, Sqlmap) improving security coverage. - Developed custom scripts and automations to boost workflows, execution speed and efficiency. CI/CD Scrum Sonarqube ZAP ISO 27001 OWASP Top 10 Java Groovy React Latex

EDUCATION

2020 - 2021	MSc in Cybersecurity and Digital Forensics , Polytechnic of Leiria, Portugal
2015 - 2019	BSc in Computer Science , Polytechnic of Leiria, Portugal
